FOR KIDS

The HODOR Buggy has a unique folding mechanism that links the backrest to the folding handle. This means that it only requires the one action of folding the Buggy frame and the seat folds in as well. This makes the HODOR buggy ideal for situations where the buggy is frequently going into the car boot

Crash Tested

Postural Support

Compact Fold

Hood and Raincover

Adjustable Push Handle

Equipment basket

Padded Frame

Based on the Streetwise Chassis, the HODOR buggy is a simpler version for mild postural needs. The friendly brake system is carried forward - along with the reliability for which our products are known.
