Unlock your lifestyle...

The Tandem Buggy from Activate is the only special needs buggy with a sensible solution for carrying a second child.

We believe that younger siblings really help a child with special needs and provide invaluable stimulation for their development. However, you still need to be able to get out and about and the Tandem is there to help you do this.

Headrests, Trunk Supports, Harnessing – everything to maintain correct alignment and avoid deformity

Tilting Seat Unit – helps with Head control as well as maintaining a good seating position if your child rocks off to sleep

Folding Chassis – folds flatter than most buggies in it's class – ideal for stowing in the car boot when the family hits the road!

Rear Suspension – a comfortable ride for your child – and more comfortable for pushing along too! Full Support System

**Please note:** we cannot reverse the position of the special needs seat on the chassis – it results in the child at the rear getting kicked in the head – as well as making the pushing balance impossible!

## And just for baby...

The Terix Chassis can be used with either the Mimmo or the Ergo solutions – giving you a complete travel system for your baby. With top-class design, the Terix Buggy is at the cutting edge of High Street buggy fashion.

### There are Three options for the Rear Seat of the Tandem Buggy

▶ The Mimmo Car Seat – suitable from Birth to 9kg. This can be used as a Car Seat for travelling and fits into the vehicle using the Vehicle seat belt.

◀ The Ergo Seat Unit – suitable from 6 months to approx 3 years. A very comfortable cocoon seat which can also be mounted onto the Terix Chassis

▶ The Standard Sibling Seat – Suitable from 18months to approx 3 years.
